RV Winterizing & Storage Checklist

Use this quick-reference checklist to prepare your RV for cold weather and long-term storage.

1 Water System

- ☐ Drain the fresh water tank
- ☐ Drain and flush the gray and black tanks
- ☐ Drain the water heater
- ☐ Set the water heater bypass valve
- ☐ Clear the water lines by blowing them out or adding RV-specific antifreeze
- ☐ Add RV antifreeze to sink, shower, and toilet drain traps
- ☐ Remove and store inline water filters

2 Engine, Generator & Battery

- ☐ Change the engine oil and filter
- ☐ Add fuel stabilizer
- ☐ Run the engine and generator to circulate the stabilizer
- ☐ Check engine coolant and antifreeze levels
- ☐ Fully charge the battery
- ☐ Disconnect the battery or connect it to a battery tender
- ☐ If the battery remains connected, check and recharge it as needed

3 Tires

- ☐ Inflate tires to the recommended pressure
- ☐ Use jack stands or leveling blocks where appropriate
- ☐ If the RV is not lifted, move it periodically to change the tire position
- ☐ Add UV-resistant tire covers if exposed to direct sunlight
- ☐ Park on a stable, dry surface

4 Interior

- ☐ Empty and clean the refrigerator and freezer
- ☐ Prop refrigerator and freezer doors open
- ☐ Remove all food from cabinets and storage areas
- ☐ Shut off the propane
- ☐ Check propane lines and connections
- ☐ Seal gaps where pests could enter
- ☐ Add moisture absorbers or a dehumidifier
- ☐ Remove valuables, electronics, and temperature-sensitive items

5 Exterior

- ☐ Wash and wax the RV
- ☐ Inspect the roof, window seals, and body seams
- ☐ Repair cracked or damaged seals
- ☐ Clean gutters and awnings
- ☐ Retract or remove items that could collect water or snow
- ☐ Use a breathable, properly fitted RV cover if the RV will be uncovered
- ☐ Close and lock all windows, vents, and storage bay doors
